 point for majority of tests. What usually happens is that the process

<u>Test case steps</u>
Validate code execution to upload the images
Invalidate code execution to upload the images
Validate code execution for menu Item 'About Me'
Invalidate code execution for menu Item 'About Me'
Validate code execution for menu Item 'Gallery Wall'
Invalidate code execution for menu Item 'Gallery Wall'
Validate code execution for menu Item 'Live Well'
Invalidate code execution for menu Item 'Live Well'
Validate code execution for menu Item 'Contact me'
Invalidate code execution for menu Item 'Contact me'

on every page

leading to this point e.g. logging into windows would have been tested prior to thi

Expected Result
User should be able to view two images on the Home page
User will unable to view two images on the Home page
User should be able to code execution for menu Item 'About Me'
User will unable to code execution for menu Item 'About Me'
User should be able to code execution for menu Item 'Gallery Wall'
User will unable to code execution for menu Item 'Gallery Wall'
User should be able to code execution for menu Item 'Live Well'
User will unable to code execution for menu Item 'Live Well'
User should be able to code execution for menu Item 'Contact me'
User will unable to code execution for menu Item 'Contact me'

s point

<u>Actual Result</u>
User is able to view the two images on the HomePage
User is unable to view the two images on the HomePage It was blank.
User is able to code execution for menu Item 'About Me'
User is unable to code execution for menu Item 'About Me'
User is able to code execution for menu Item 'Gallery Wall'
User is unable to code execution for menu Item 'Gallery Wall'
User is able able to code execution for menu Item 'Live Well'
User is unable to code execution for menu Item 'Live Well'
User is able to code execution for menu Item 'Contact me'
User is unable to code execution for menu Item 'Contact me'
